Factory equipment that fits

From the user for the user. With passion for what we do.

We have been active as a metalworking company in the development and production of professional factory equipment for the past 30 years.

Well-engineered products, that prove their worth in everyday work are the result of our long-standing experience, the selection of first class materials and solid workmanship.

The principles of our company philosophy are framed in the optimization of production processes, the increase in storage capacity and efficiency as well as the reduction of access times.

In order to meet the highest level of customer satisfaction and quality, our products are produced, assembled and made ready for dispatch exclusively in our production plant in Dossenheim near Heidelberg, Baden-Württemberg.

On the following pages see for yourself a comprehensive range of high quality equipment for storage logistics and maintenance that convinces with expertise and diversity.

What you can expect from our products:

Decrease investments, ensure sustainability

We guarantee sustainability through the durability of our products, which can also be used for decades and adapted to your requirements at any time.

Shorten search times, boost production times

The workplaces we design for you, adapt perfectly to the requirements of your production and always provide your employees with the right tools and materials.

Save space, reduce storage costs

With the maximum use of your capacities, you store all the materials you need in the smallest of spaces.

Avoid downtime, increase productivity

Ergonomic workplaces will enable your employees to do their work without tiring.

Arrange an appointment for a non-binding consultation on workplace optimization for your company!

At Apfel I can experience the progress live.

I work on computer-controlled machines and robots in a young, motivated team.

Lukasz, Production Manager

From the first draft to the finished product

As a supplier for global companies, we produce factory equipment which is designed, constructed and manufactured in-house with the highest quality standards.

The subdividable, slanted bulk material trays store screws, standard parts and C-items in a space-saving and clearly arranged manner.

Set up your own individual storage cabinet

The versatile multipurpose tray for all kinds of storage goods

Thanks to its well thought-out design, our newly developed tray stores a wide variety of goods. Whether you divide it with tool-free plug-in dividers in 50 mm gradations, use it as a shelf for boxes and containers or equip it with storage bins and insert elements - the universal tray turns the WKS into a cabinet that stores everything.

ARA - the mobile shelving system for maximum utilisation of space

Without guide rails, ideal for cold rooms, basements and underground parkings

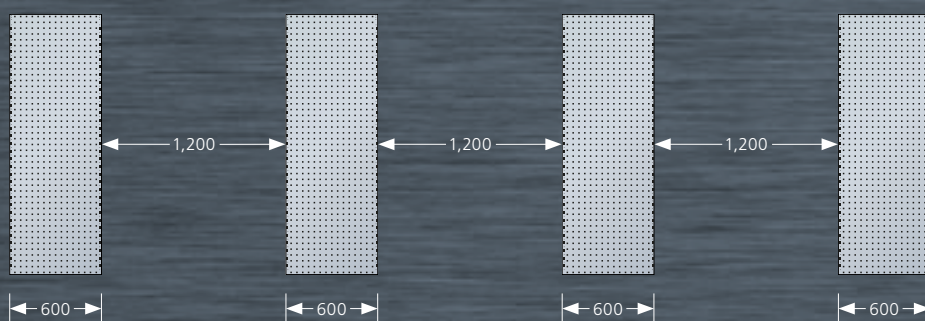

Utilise your existing storage space to the maximum with our high-density storage concept

To reach the stock in a conventional warehouse, passages of at least 1 metre width must be kept clear between each rack - leaving a large part of the space unused.

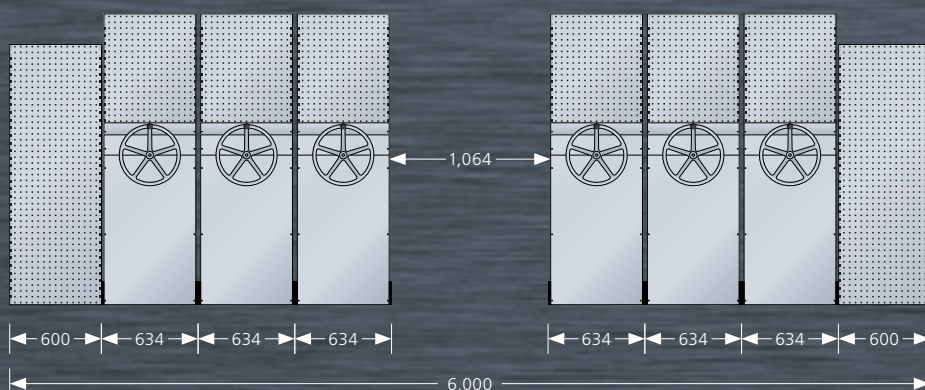

Since the mobile shelving system requires only a single access aisle to reach the stored goods, the available space is used perfectly.

The illustrated example shows that the storage area is already doubled at a room width of approx. 6 metres. The additional capacity increases with each additional metre - without any structural expansion, higher occupancy cost or complex installation.

Conventional setup with storage shelves

Doubled storage capacity with the Apfel mobile shelving system

Your contact

Dirk Böcker

Phone +49 6221 8761-15

d.boecker@apfel-gmbh.de

Clean, safe and space-saving storage using sophisticated technology

The classic principle of archiving in solid Apfel quality ensures maximum storage capacity thanks to the mobility of the rack modules.

The ARA does not require any guide rail and can simply be used on a level floor without any trip hazards, making it particularly suitable for use in hygiene-critical areas.

Even in energy-intensive storage areas, such as deep-freeze rooms, the mobile shelving system is the efficient method for a space and resource-saving storage of all types of goods.

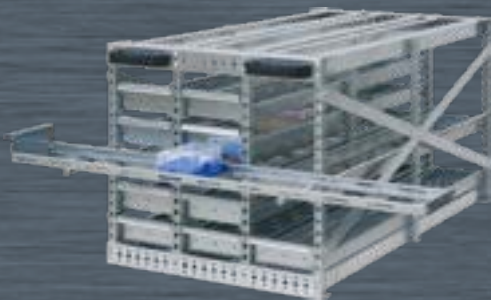

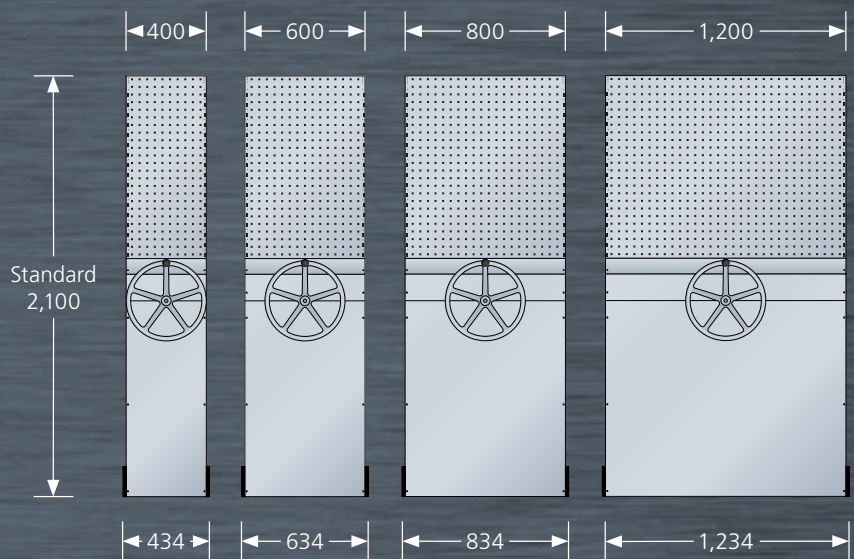

As no cross bracing or struts are required, the entire storage area remains freely accessible at all times.

The modular design and various rack widths, heights and depths provide perfect utilisation of the available space.

Numerous options for customising your mobile shelving system

- Stainless steel, aluminium, galvanised or powder-coated sheet steel
- Combinable module in widths of 400, 600, 800 and 1,200 mm
- Optional set ups of three, five or seven elements in depth
- Additional equipment e.g. shelves, perforated panels or drawers
- Lockable hinged doors on both of the sides with quick-release hinges

Available module widths

Optional drawer system for the storage of pharmaceutical products under deep-freeze conditions

Smooth running by connecting shafts that transmit the rotation of the handle to all wheels

The reversible shelves can be used both as a recessed storage tray and with a flat loading edge

The shelves can additionally be fixed without tools using practical fastening hooks

Use Apfel AWR honeycomb shelves to create your customised storage system with quick access to bar material and professional storage of cut parts while simultaneously stockpiling numerous large containers and palletized goods on high rack systems!

AWR - the Apfel honeycomb rack for the storage of round bar materials

The Apfel honeycomb rack stores semi-finished products and bar material for lathes and milling machines safely and within easy reach.

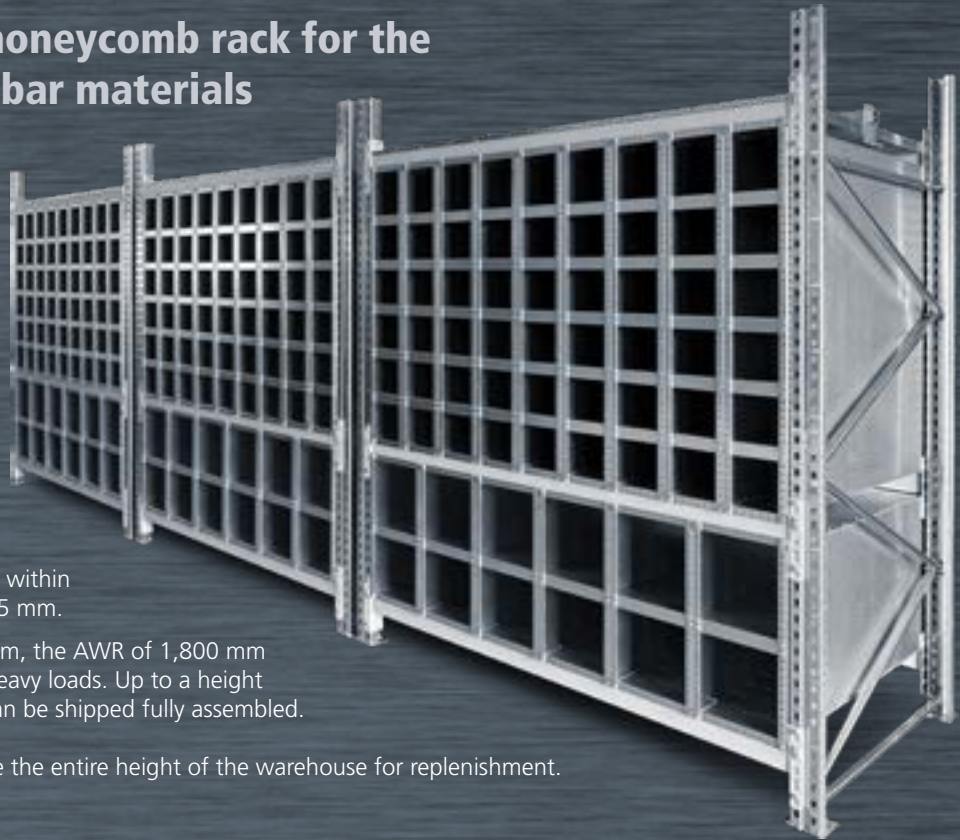

The reversible shelves can be used both with a flat loading edge as well as upside down as a recessed storage tray.

By a vertical hole spacing of 25 mm, different compartment heights can be adjusted.

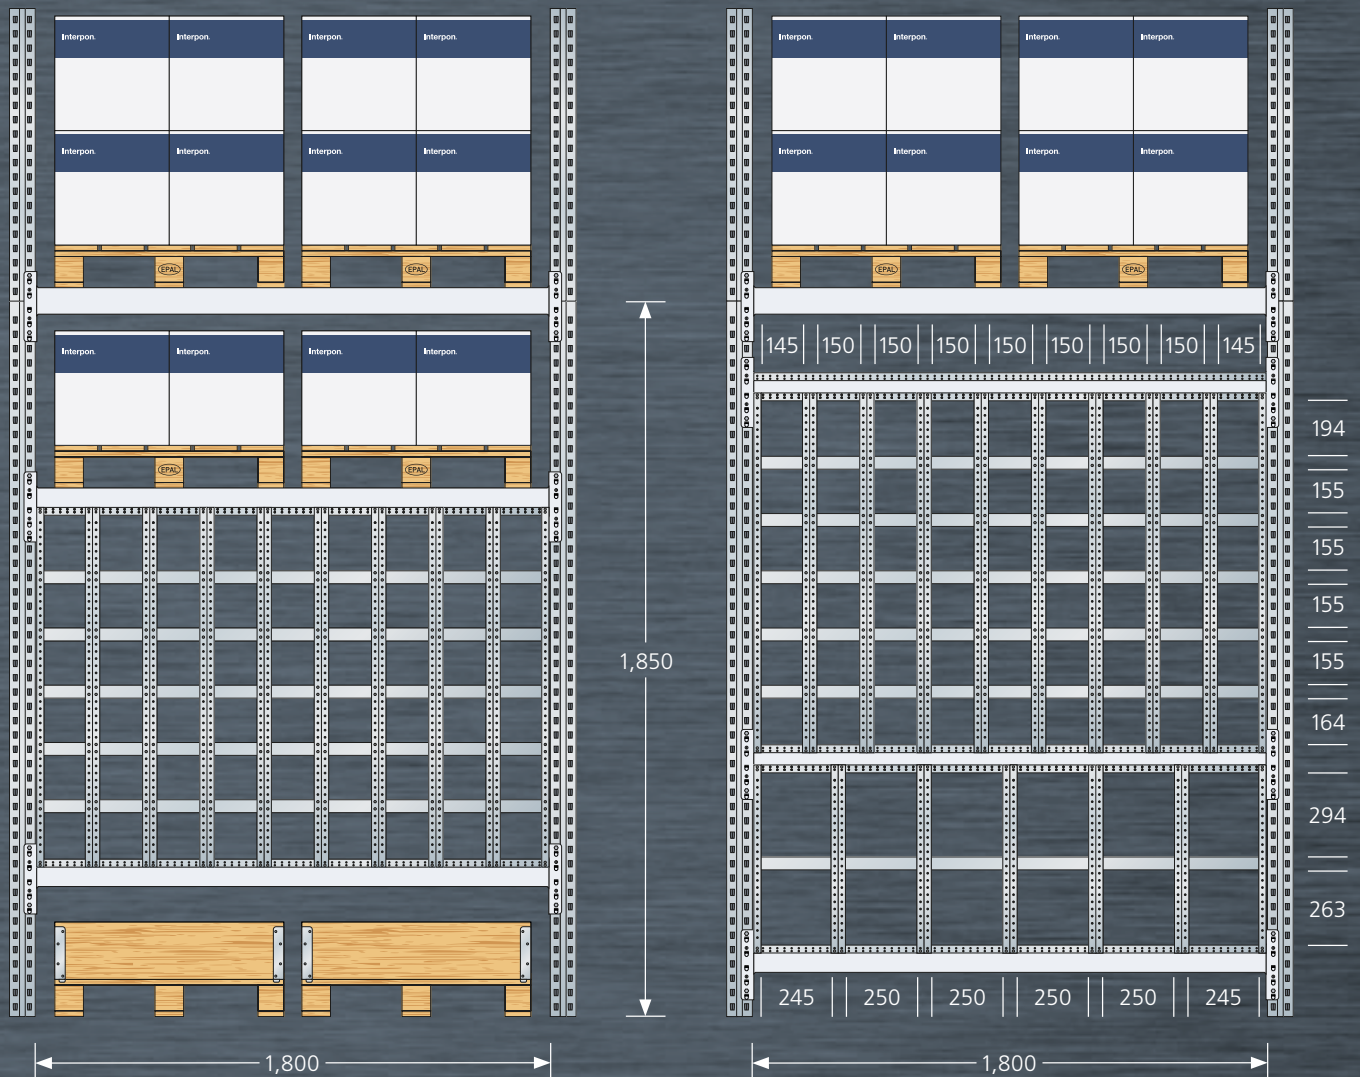

Any shelf width can be supplied within the horizontal hole pattern of 25 mm.

At a standard depth of 1,100 mm, the AWR of 1,800 mm width is ideally suited to carry heavy loads. Up to a height of 3,000 mm, the entire shelf can be shipped fully assembled.

Attachable high-bay racks utilise the entire height of the warehouse for replenishment.

ASS - the Apfel system column that provides all your work utensils

In the smallest possible footprint, the Apfel system column creates plenty of space for all materials needed at the assembly point. All components have square holes of 10 x 10 mm and round holes of 5 mm for hooks, brackets, holders and screw connections. The multi-purpose shelves can be mounted horizontally or at an angle, the rear wall offers additional space for tools. Of course, two columns can be set up back to back or four in combination to form a complete work station.

ASS 6360 Assembly

Apfel system column for assembly stations including:

6 multi-purpose shelves ASB 6030 made of galvanised sheet steel 664 mm w x 342 mm d x 35 mm h

The MTS waste separator - cleaning and disposal without garbage bags

The MTS waste separation station makes disposing of your waste quick and easy.

It is fully mobile and can therefore reach the spot where the waste occurs.

Everything is collected in plastic bins and emptied into the respective container without any garbage bag.

The MTS can be configured with up to 6 modules and comes with cleaning utensils required to pick up the various types of waste.

Watch our video
(German)

The MTS is available with 1, 2, 3, 4, 5 and 6 modules

Optimum fire protection

Removable slot grid containers with tool-free adjustable dividers for the customizable storage of various kinds of articles

Wherever your storage items have to be transported to and from a workplace, our removable slot grid containers provide the optimum solution. To match your storage needs, they are available in widths from 150 to 400 mm. Thanks to their high rigidity, the enclosed containers with integrated bottom offer high payload and safe removal. Without the use of any tools the dividers can be individually positioned within the 10 mm slot grid.

Entirely made of galvanised sheet steel, they meet the requirements of fire protection regulations. To prevent injuries, the outer edges of the components are folded.

Metal storage boxes for the individual partition of your trays

Whether made of lightweight aluminium or sturdy steel, thanks to their low material thickness, Apfel storage boxes keep the loss of space to a minimum.

LTK - customized storage towers from Apfel

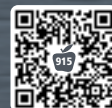

- Available in many RAL colours
- Optional access openings on both sides and different floors
- Height gradations of 100 mm for the perfect use of the entire room

With Ethernet interface

Adaptable to robot systems

Watch our ePaper

Optional accessories

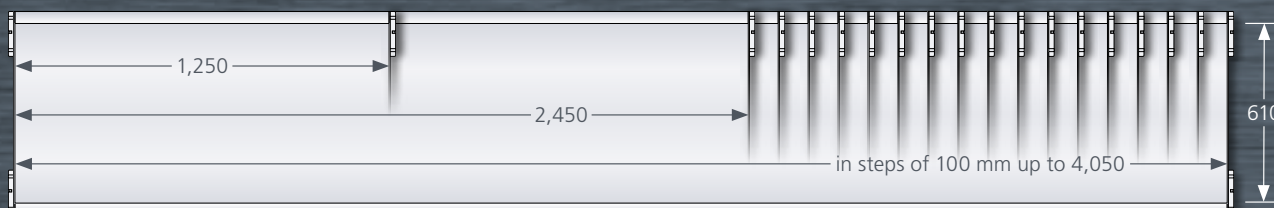

With the foldable pull-out rack and the roller-mounted side rails, the trays can be extracted with a flick of the wrist.

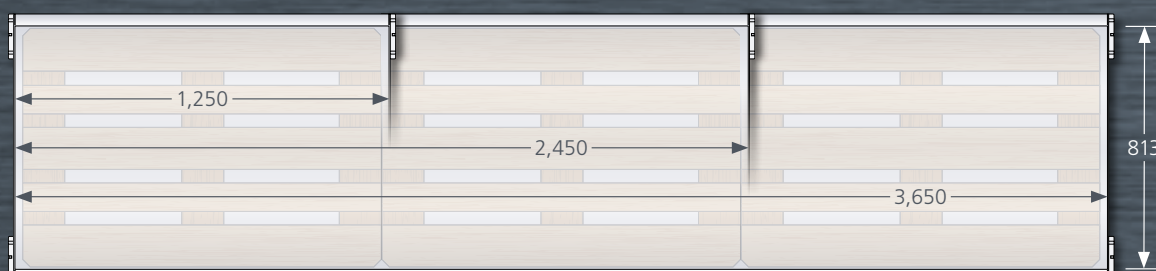

The transport cart moves trays with their stored goods easily, quickly and safely to and from your storage tower.

Configure your individual storage tower

Create your individual LTK storage tower based on trays of 610, 813, 864 or 1,070 mm effective depth, up to 4,050 mm effective width and payloads from 250 to 1,000 kg. Thanks to the space-saving technology the width of the entire unit results from the effective width of the shelf and only 330 additional mm for the guides and the support frame on both sides.

The fusion of progress and tradition in storage

Wherever quick access to stock is essential, the LPL is the ideal warehouse for all types of goods.

The space-saving design of the vertical carousel uses the entire volume, including the output opening, to offer maximum storage capacity on a minimum footprint, even at low room heights.

By its short way to access, the LPL suits particularly to the storage of uniform containers with high access frequency.

Due to the foldaway work surface, parts can not only be picked up, but also set up right by their removal.

Paternoster technology

Short access times

Low overall depth

Widths from 1,875 up to 4,275 mm

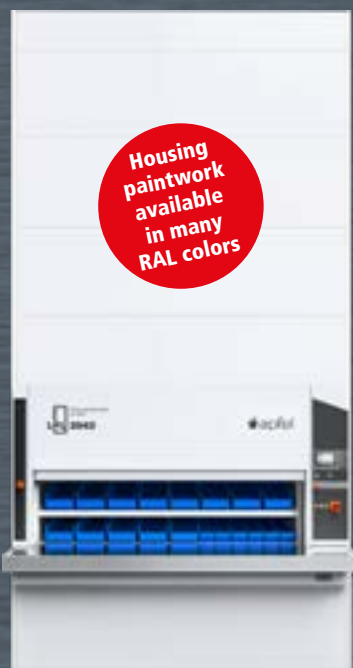

Ergonomic access height

Apfel - the specialist for AGV trailers crafts your individual superstructure

10,000 times proven quality, in use worldwide

As supplier to logistics and mail order companies in the European and American markets, Apfel has been producing AGV trailers in large quantities for many years.

Germany's leading supplier with complete in-house production

Production, assembly and shipping take place exclusively in our own production facilities in Dossenheim, near Heidelberg in southern Germany.

High production capacity, rapid availability

The modern technology of our sheet metal processing facilities ensures top quality at high production speed to realize large quantities in a timely manner.

Versatile designs and options for all applications

Upon customer request, Apfel creates customised carriers for all common systems - whether closed, open on two, three or four sides, with hangers, shelves or compartments.

Perfect intralogistics through customised superstructures

Individually designed Apfel AGV load carriers increase productivity, optimise transport safety and reduce the risk of costly malfunctions.

Central components in the logistics processes of numerous globally active companies

With its know-how, Apfel has made a name for itself in the logistics industry - every year more than 10,000 agv trailers are shipped to their users around the globe.

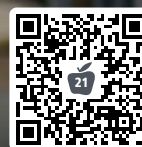

All transport orders are triggered by an order picker via the enterprise resource planning system and transmitted to the available automated guided vehicles.
